The Sonoma County Board of Supervisors are continuing to push an expensive sewer system, both to construct and to maintain, that has limited capacity and will serve only about 25% of the existing area.

At the same time they are doing studies on another proposal to pipe sewage from Occidental and Camp Meeker through Monte Rio to an expanded Russian River Sanitation District plant at Guerneville.

Sewer costs and maintenance will most likely be less for this system addition than for the proposed Monte Rio system. A plan for all the area should be completed before any of it is built.

I am asking that the \$3.5M that has been requested for the Monte Rio Sewer Project be denied.

Thank you,
Gary Getchell
